# Processor Names

Many Cybersource reports include a payment processor value:

- In XML reports, the name of the element is usually `<PaymentProcessor>`.
- In CSV reports, the name of the field is usually **payment\_processor**.

In most reports, a payment processor value is a raw, unmapped value from the Cybersource software. A few reports use mapped payment processor values. For information about the main Cybersource reports, see the [Business Center Reporting Developer Guide](#).
