

# Processor Names

Many CyberSource reports include a payment processor value:

- In XML reports, the name of the element is usually `<PaymentProcessor>`.
- In CSV reports, the name of the field is usually `payment_processor`.

In most reports, a payment processor value is a raw, unmapped value from the CyberSource software. A few reports use mapped payment processor values. For information about the main CyberSource reports, see the [Business Center Reporting Developer Guide](#).

## Raw Payment Processor Names

**Table 1** Raw Payment Processor Names

Raw Name	Processor
